

Dear Sirs,

We have audited the accompanying Ind AS consolidated financial information of Steiner AG and its subsidiaries (the "Steiner-Group" or the "Group"), comprising the Consolidated Balance Sheet as at 31 March 2021, the Statement of Change in Equity, the Consolidated Statement of Profit and Loss, and the Condensed Consolidated Statement of Cash Flows for the year then ended, and the notes (the "specified forms").

Management's Responsibility

The Holding Company's Board of Directors is responsible for the preparation of the Ind AS consolidated financial information in terms of the requirements of the Companies Act, 2013 (the Act) that give a true and fair view of the consolidated state of affairs (consolidated financial position), condensed consolidated statement of profit and loss (consolidated financial performance), consolidated statement of cash flows and consolidated statement of change in equity of the Group, in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act. The respective Board of Directors/Management of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS consolidated financial information that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Company, as aforesaid.

Steiner AG prepares its consolidated financial information in accordance with the Swiss GAAP FER Accounting Manual. The Ind AS consolidated financial information is prepared based on reconciling items from Swiss GAAP FER Accounting Manual to Ind AS. These specified forms have been prepared for the sole purpose of inclusion into the consolidated financial statements of Hindustan Construction Company Limited ("HCC") and do not purport to be full financial statements in accordance with Ind AS.

Auditor's Responsibility

Our responsibility is to express an opinion on the consolidated financial statements in accordance with the Swiss GAAP FER Accounting Manual and the reconciling items from Swiss GAAP FER Accounting Manual to Ind AS consolidated financial information, for the purpose of inclusion in the consolidation of HCC.

We conducted our audit in accordance with International Standards on Auditing ("ISA"). Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Ind AS consolidated financial information is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated financial information. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial information, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial controls relevant to the Company's preparation of the consolidated financial information that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial information.

We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on this Ind AS consolidated financial information.

Opinion

In our opinion, the consolidated financial statements according to Swiss GAAP FER Accounting Manual and the reconciling items from Swiss GAAP FER Accounting Manual to Ind AS consolidated financial information are free from any material misstatements.

Emphasis of Matter

We draw attention to Note "Going Concern" of the Ind AS consolidated financial information describing various circumstances the company faced during the financial year ended 31 March 2021. These facts indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. Our opinion is not qualified in respect of this matter.

Restriction of Use

This report is solely for your information and use in conjunction with the audit of the group financial statements of HCC and should not be used by anyone for any other purpose.

Note: 1

During the year 2019-2020, the Company adopted the Input method for calculation of percentage of completion (POC) to be in line with Group accounting policy. The changes were adopted for periods after 01.04.2018. Accordingly, cumulative effect of the change as on 01.04.2018 has been adjusted in retained earnings and the Balance Sheet as on 31.03.2020 has been restated.

Notes to the Consolidated Financial Statements

Criteria for preparation of consolidated financial statements

1 Steiner AG has prepared the consolidated financial statements to provide the financial information of its activities along with its Subsidiaries as a single entity. They are collectively referred as "Group" herein.

The consolidated financial statements are prepared by :

- i) Consolidating its accounts with financial statements of its Subsidiaries.
- ii) Applying the equity method of accounting for its investee companies in which it holds between 20 and 50 percent of the equity share capital. Joint operations are included using proportionate-consolidation as per revised IND AS 111.
- iii) Foreign subsidiaries financials are prepared in compliance with the local laws and applicable accounting standards, necessary adjustments for differences in the accounting policies wherever applicable have been made in the consolidated financial statements.
- iv) Financial Statements of overseas non-integral operations are translated as under
 - i) Assets and Liabilities at the rate prevailing at the end of the year
 - ii) Revenues and expenses, including depreciations and amortisation at yearly average exchange rate prevailing during the yearExchange differences arising on translation of non-integral foreign operations are accumulated in the foreign currency translation reserve account until the disposal.

2 Method of Consolidation

The consolidated financial statements have been prepared by the Company in accordance with the requirements of IND Accounting Standard (IND AS) 110 - "Consolidated Financial Statements", IND Accounting Standard (IND AS) 28 - "Accounting for Investments in Associates" and IND Accounting Standard (IND AS) 111 - "Joint Arrangements".

The period-end balances and the common transactions with the Subsidiaries are eliminated in full. Because of comparability, due to some reclasses in the balance sheet and P/L, the previous year figures were presented accordingly. Due to rounding, the numbers do not necessarily correspond exactly with the totals

Significant Accounting Policies and Notes

1. Basis of Accounting and use of Estimates

All estimates and assumptions are re-evaluated on an on-going basis and are based on historical experience as well as expectations regarding future events which appear reasonable under the given circumstances.

IND AS 116 for accounting of Leases, which is effective for periods on or after 01.04.2019 was adopted during the financial year. Only long term Lease rental contracts have been considered for the purpose.

Modified retrospective method has been adopted by the Company for implementation of IND AS 116.

2. Revenue from Total and General Contracting

Long-term contracts for the construction of third-party real-estate are accounted for using the percentage of completion (POC) method, whereby external and internal costs and estimated profits are taken into account. The degree of completion is determined on the basis of the work performed on the construction site. The different executed activities of the project are measured based on available units (e.g. m, m², m³, kg) in comparison to the total quantities needed for the completion (surveys of the work performed-method).

With the application of the surveys of the work performed-method, the difference between contract costs incurred and contract cost recognised (billed) is accrued in prepaid expenses respectively accruals.

Contract costs are recognized as an expense in the period in which they are incurred. Contracts and groups of contracts for which the degree of completion or the outcome cannot be reliably estimated are capitalized only to the extent of the amount of the contract costs that are highly probable to be recoverable. Anticipated losses from construction contracts are covered in full by valuation allowances. In accounting for contracts in progress, contractual revenue comprises the contractually agreed revenue and amendments / variations and claims that have been confirmed by the customer or for which payment is considered highly probable.

In the case of TC/GC work on own properties, only costs (including own work and interest incurred, excluding profit share) which have actually been incurred until the transfer of the risks and rewards to the customer are capitalized.

3. Revenue from real estate development

Revenue from the sale of real estate projects is realized on the transfer of title or the transfer of material risks and rewards to the purchaser.

Real Estate Investor Projects are accounted for as construction contracts based on percentage of completion (POC). Accordingly revenue and the gains of development is recognised along the construction of the building.

The separate sale of project development rights and plans is accounted for as sale and the revenue and gains are realised at the time of the transfer of risks and rewards.

Real Estate Development projects with multiple buyers (i.e. condominium projects) are accounted for according to the specific guidance note of IND AS. E.g. revenue is only recognised if the POC is above 25% maximum to the extent of revenue based on cost-to-cost method.

4. Financial expenses/capitalised interest

Interest expense is recognized directly in the income statement as an expense for the period to which it relates. Interest expense which is directly attributable to real estate or TC/GC-projects is capitalized as a part of the construction cost. Thereby the interest expense actually incurred is capitalized, as borrowing takes place for each individual project.

5. Financial Assets

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

6. Receivables/Liabilities from Projects

Customer contracts in progress are shown as an asset in the balance sheet under "Receivables from projects, net", or as the liabilities side under "Liabilities from projects, net". If the prepayments received from customers exceed the project receivables, these are shown under liabilities; otherwise, these are shown under assets.

These positions comprise the total contract costs incurred (actual and accrued), including a share of the profit, less customer prepayments and allowances for expected losses.

7. Real estate projects

Real estate projects are valued based on the lower of the construction cost and the sale price until the project is handed over to the purchaser by means of the transfer of title or the transfer of material risks and rewards. Borrowing costs relating to real estate projects with duration of more than one year are capitalized over the entire duration of the project if the development costs are allowed for capitalization. Payments by customers for a specific project are offset against the construction cost as the customers have generally already notarially signed the purchase contract. Undeveloped land (inc. development costs) and finished units which are held for sale are valued at the lower of construction costs and net selling price.

8. Property, plant and equipment

IT, furnishings, tenant fit-out and equipment as well as motor vehicles are recognized in the balance sheet at acquisition cost less accumulated depreciation and any allowances necessary due to impairment. Depreciation is on a straight line basis over the estimated useful life. Depreciation rates are between 5% (for certain elements of tenant fit-out) and 33%.

9. Investments

Investments in associates in which the Steiner-Group exercises significant influence, but does not have control (generally 20% to 50% of the voting rights), are recognized in the consolidated financial statements using the equity method. As per revised IND AS 111, Joint operations are consolidated using proportionate consolidation.

Under the equity method, investments in associates are recognized in the balance sheet at cost and subsequently adjusted to reflect the changes in the Group's share of the net assets of the associate. Any goodwill connected with the associate is included in the carrying amount of the investment and not depreciated. The income statement includes the Group's share in the income of the associate. Changes recognized directly in the equity of the associate are recognized by the Group in proportion to its investment and reported under the statement of changes in equity as appropriate. Gains and losses from transactions between the Group and associates are eliminated according to the share in the investment in the associate.

Investments, which are readily realisable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as non-current investment. Current investment are carried in the financial statements at lower of cost or fair value determined on an individual investment basis. Non-current Investments are carried at cost, provisions for diminution in value is made to recognise a decline other than temporary in the value of the investments.

10. Post-employment benefits plan

Based on their characteristics, the post-employment benefit plans of the Steiner-Group qualify as defined benefit plans under IND AS 19. The projected unit credit method is used for the calculation of the net present value of the defined benefit obligation (or 'DBO'). For the purposes of determining the DBO, this method takes account of the years served to date, with an additional unit being added to the DBO each year.

For active plan participants, the defined benefit obligation is thus equal to the net present value of the post-employment defined benefits, taking into account future salary and pension increases as well as the rate of employee turnover. For retirees, the defined benefit obligation is equal to the net present value of current pensions, taking into account future pension increases.

The total defined benefit obligations are compared to the fair value of the plan assets. Any surplus is recognised as an asset up to the benefit of the Group. Any shortfall is reported in the balance sheet as a liability. Actuarial gains and losses are accounted through Other Comprehensive Income Statement (OCI).

11. Cash and cash equivalents

Cash and cash equivalents comprise of cash at bank, postal giro and cash in hand as well as any time deposits with a maturity of less than three months. These are stated at nominal value.

12. Earning per share

Basic and diluted earning per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders and weighted average number of equity shares outstanding during the period.

There are no differences between basic and diluted earning per share since there is no dilutive potential.

13. Deferred taxes

Deferred taxes are accounted using the Balance Sheet approach, which focus on temporary differences at the reporting date between the tax bases of assets and liabilities. Deferred tax is measured using the applicable local tax rates.

Available loss carry forwards and tax credits are only recognized as deferred tax assets to the extent that it is virtually certain that there will be sufficient future taxable profit against which the loss or credit carry forwards can be utilized. The Company reassesses the non-recognized loss carry forwards and reviews the carrying amounts of the deferred tax assets each year at the balance sheet date.

14. Provisions

The measurement of provisions is based on the best possible estimate, taking into account related risks and uncertainties. The provisions are reviewed at each balance sheet date and adjusted to reflect the current management estimates.

15. Contingent Liabilities

Possible obligations for which an outflow of resource is considered unlikely are not recognized in the balance sheet. However, contingent liabilities are disclosed in the notes at each balance sheet date.

16. Segment Reporting

The Company has a single segment namely "Building Construction". Therefore, the Company's business does not fall under different business segments as defined by IND AS 108 - "Operating Segments".

19. Warranty provisions:

CHF Million

After the handover of the building there is a warranty liability, which lasts between 2 and 10 years, depending on the building and its components. During construction the warranty provision is recorded based on past experience and, in general, remains unchanged during construction. Actual warranty costs are recorded against the warranty provision of projects in warranty phase (pool approach). As per closing date, future warranty costs are estimated and if needed the warranty provisions are increased or released. The subsequent major cash flows of remaining provisions will take place over next five years.

21. Disclosure relating to Employee Benefits - IND AS 19

Steiner Foundation

The objective of the Steiner Foundation is to pay voluntary benefits to relieve the economic consequences of old age, death and disability and, in cases of particular hardship, the consequences of sickness, accident or unemployment. It can make contributions or payments to the Steiner-Group Switzerland Pension Plan.

Salary increase rate -0.5%	(1.62)	(1.72)

22. Interests in Joint Arrangements

As per Ind AS 111 - Joint Arrangements, investment in Joint Arrangement is classified as either Joint Operation or Joint Venture. The classification depends on the contractual rights and obligations of each investor rather than legal structure of the Joint Arrangement. The Company classifies its Joint Arrangements as Joint operations or Joint ventures.

The Company recognises its direct right to assets, liabilities, revenue and expenses of Joint Operations and its share of any jointly held or incurred assets, liabilities, revenues and expenses. These have been incorporated in the financial statements under the appropriate headings.

Sensitivity Analysis

Interest

The operating profits and cash flows of the Steiner-Group are exposed to interest rate risk due to fluctuations in interest rates on the capital market. Interest rate risk affects in particular the financial investments and the current and non-current borrowings (information on these items is given in the notes). Changes in interest rate risk are supervised on an ongoing basis.

The table below illustrates how sensitive profit before taxes and capitalized real estate projects (regarding project financing) are to a potential movement in the interest rate, assuming all other variables remain constant. Movements in the interest rate associated with project financing which has been capitalized for real estate projects have a delayed impact on profit before taxes and equity.

in CHF Mill.		2020/21	2019/20
Increase in interest rate by 15 basic points (0.15%)	Effect on profit before tax	0.13	0.09
Increase in interest rate by 10 basic points (0.10%)	Effect on profit before tax	0.09	0.06

Foreign exchange risk

Steiner-Group is primarily active in Switzerland. Foreign exchange risks arise from fluctuations in value between the Euro and Indian Rupees against the CHF. However, most transactions by the subsidiaries in Germany and India are executed in the functional currency. There is also a foreign exchange risk on non-current intra-group loans and on the share of investment, although these movements in the exchange rate are recognized directly as comprehensive income. Foreign exchange risk is constantly monitored and hedged as required, for example, by means of forward exchange contracts.

The table below illustrates how sensitive profit before taxes and equity are to a potential movement of the Euro and Indian Rupees (INR), assuming all other variables remain constant.

in CHF Mill.		2020/21	2019/20
Increase of EUR by 5%	Effect on profit before tax	0.01	0.05
	Effect on Equity	0.62	0.63
Reduction of EUR by 5%	Effect on profit before tax	(0.01)	(0.05)
	Effect on Equity	(0.62)	(0.63)

in CHF Mill.		2020/21	2018/19
Increase of INR by 5%	Effect on profit before tax	0.03	0.05
	Effect on Equity	0.67	0.64
Reduction of INR by 5%	Effect on profit before tax	(0.03)	(0.05)
	Effect on Equity	(0.67)	(0.64)

Credit risk

Credit risk relates in particular to trade receivables (customers) and trade payables (suppliers) from current projects. In view of the customer portfolio of the Steiner-Group, there is no significant concentration of risk. At Group level, there is also no significant dependence on sub-contractors. There is, however, a counterparty risk from the bankruptcy of sub-contractors. With respect to counterparty risk (creditworthiness and default risk), the Group has implemented a credit risk management procedure, together with a related allowance policy, whereby project management and the Controlling department review open positions on an ongoing basis and recognize impairments as appropriate. When granting loans to third parties (for example to project companies or to third parties), collateral in the form of borrower's notes is usually requested.

The maximum credit risk corresponds to the carrying amounts recognized in the balance sheet and the notes.

Liquidity risk

Liquidity is controlled and managed on an ongoing basis both at Group level and project level. The aim in TC/GC-projects is always to finance construction costs, own work and profit shares by means of prepayments from customers.

Capital management

Target in the capital management is to show a reasonable consolidated equity (incl. subordinated and shareholders loans).

Equity is managed by the reported profit, dividend payments and capital increases or reductions. Steiner-Group defines capital as reported equity including minorities and shareholder loans.

Investment properties/land reserves

Investment property is property held to earn rentals and for capital appreciation rather than for sale in the ordinary course of business. This also includes property that is being constructed or developed for future use as investment property as well as land reserves held for a currently undetermined future use. The valuation at the time of initial recognition is based on acquisition costs, including directly attributable transaction costs. After the initial recognition, the fair value model is applied. Changes in market value are taken to the income statement considering deferred taxes.

Going Concern

The World Health Organization has officially declared the spread of the coronavirus (COVID-19) a pandemic as of 12 March 2020. On 19 March 2020, the federal council of Switzerland consequently decided on a partial lockdown. Steiner as a construction company mainly operates in Switzerland with an international supply chain and is therefore part of the Swiss and global construction industry dealing with the challenges the virus poses for everyone involved.

The two previous business years were impacted by the consequences of the pandemic and required material impairments on a limited number of TC/GC projects. Management expects FY2021/22 to be a profitable year for the Company. However, as of the reporting date the impact of COVID-19 on these periods cannot finally be assessed.

Additionally, Steiner maintains a bank facility with a syndicate mainly with the objective to provide guarantees for its construction projects expiring 31 August 2021. The facility agreement sets forth covenants related to minimum equity, minimum EBIT margin and minimum liquidity, which the Company fully complies with as of 31 March 2021. Management is in discussion with the banks in order to agree on a prolongation of the syndicated revolving guarantee facility agreement. However, as of the date of this report, a final and legally enacted agreement covering a period of 12 months following the balance sheet date is not in place.

The three points above

- consequences of COVID-19 including
- uncertainties in relation to the budget and liquidity planning and
- the pending renewal of the syndicated revolving guarantee facility agreement

present a material uncertainty that cast significant doubt about the entity to continue as going concern, if one or a combination of them materializes

The board of directors (BoD) and management assume that the company will overcome these uncertainties, will come to an agreement with the bank syndicate and that recoverability of unsigned change orders and claims is highly probable. The BoD and management believe that Steiner is well established and that the assumption of Steiner to continue as a going concern is appropriate

Recognised fair value measurements

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes mutual funds that have quoted price. The mutual funds are valued using the closing NAV.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.
